

Work, well made.

People, agents, and connected tools.

Teamwright

From a request to a usable result

- Coordinate work in one workspace.
- Give agents useful context.
- Follow progress and review proposed actions.

A shared thread of work

Context makes the work usable

People bring judgment

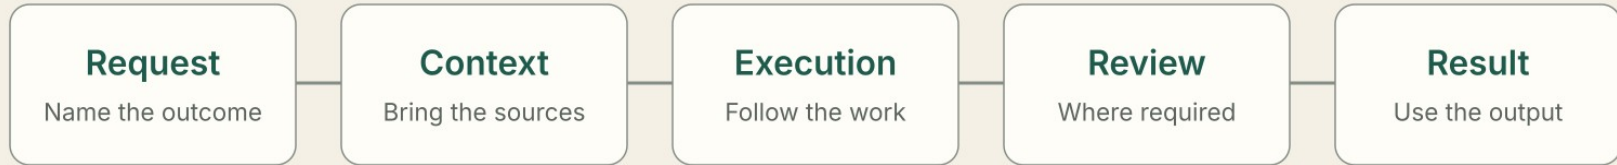

- Define the outcome.
- Supply relevant knowledge.
- Review when required.

Agents contribute execution

- Work from the supplied context.
- Make progress visible.
- Produce an inspectable result.

See how the pieces connect

Illustrative sequence; actual review points depend on the workflow.

Illustrative workflow. Review points depend on the workflow.

Every step has a clear owner

Step	Actor	Output
Request	Riley	Outcome and scope
Prepare	Research agent	Sourced draft
Review	Morgan	Feedback where required
Use	Team	Usable brief

Keep the decision visible

- Show what is proposed.
- Identify the target and consequence.
- Keep sources and open questions accessible.

Bring the right context. Make useful work.

Teamwright brings people, AI agents, and connected tools together to turn requests into usable results.
